laserdata

Prepared for **Riot Games**

Real-time anti-cheat terminations for Riot Games, on LaserData.

Every shot reaches **the anti-cheat scorer, and every match termination reaches its game server, in milliseconds**, before the cheater's next shot lands. It runs beside MSK, so nothing else has to move.

One aimbot in one VALORANT match,
as the event log sees it.
Now multiply by every match on the shard.

```
21:14:03.000   shot.hit         p7c1e09a1  vandal   rt 82 ms · snap 41° · head
21:14:03.625   shot.hit         p7c1e09a1  8th hit, 7 flagged
21:14:03.629   match.terminate  m004217    TERMINATED (aim anomaly)  +4 ms
21:14:03.632   applied          gs-03, before the next shot lands  +3 ms
```

From the creators of APACHE IGGY

15×
faster P99 latency
than Apache Kafka

4×
higher throughput
than Apache Kafka

60–70%
lower infrastructure cost
compute, storage and network

Apache Iggy vs Apache Kafka, LaserData testing. Results vary by workload.

What you shared	Anti-Cheat is building **"real-time machine learning models to detect gameplay anomalies"** over "millions of high-throughput game actions per second". Until a cheater is banned, "players are losing their hard-earned RR". (Riot job post, Oct 2026; Vanguard x VALORANT)
Where it fits	**The combat lane:** shots keyed by match into the anti-cheat scorer, terminations back to the game server running the match. REBus, MSK, Honu and the analytics pipelines stay.
Next	**AI agents** review and action flagged players on the same lane, with session, context, memory and replay from Laser SDK.
Underneath	**One durable event log.** LaserData, powered by Apache Iggy.

Try it in 15 minutes. Let the numbers decide.

A ready-made kit for Riot Games: **8 game server hosts × 108 matches, 10,000 shots/s**, an anti-cheat scorer, a planted aimbot every 2 seconds, an analytics flood next door and an MSK shadow bridge. It prints your lane's p99 and aimbot shots landed after a termination every second.

Open the Riot Games kit and write-up →

Then a 2–4 week evaluation on one mirrored combat-actions topic for one shard, alongside MSK. **No advantage, no migration.**
