laserdata

Prepared for **Freshworks**

Real-time agent availability for Freshworks Omniroute, on LaserData.

Every status change, call, chat and ticket reaches **every routing node in milliseconds**, so work goes only to agents who are free, even in a shift change. It runs beside your Kafka clusters, so nothing else has to move.

One agent on a Monday morning,
as the event log sees it.
Now multiply by every agent.

09:00:00.212	call.start	A0418827	freshcaller · on a call, chats 1 of 3
09:00:00.216	routing.view	A0418827	seq 5512 applied · not eligible
09:00:00.650	chat.new	C8812304	group billing-support
09:00:00.652	router: A0418827 on a call, skipped · assigned to A0418830		

From the creators of APACHE IGGY

15×
faster P99 latency
than Apache Kafka

4×
higher throughput
than Apache Kafka

60–70%
lower infrastructure cost
compute, storage and network

Apache Iggy vs Apache Kafka, LaserData testing. Results vary by workload.

What you shared	**Kafka is central to all inter-product communications:** 5 self-hosted clusters, the largest 21 nodes at 12 TB a day. Omniroute assigns on each agent's real-time workload and availability across Freshdesk, Freshchat and Freshcaller. (Freshworks blog, 2023; Freshdesk docs, 2026)
Where it fits	**The agent state lane:** status, calls, chats and tickets against capacity, keyed by agent, read by every routing node. Omniroute's rules, your Kafka clusters and the data platform stay.
Next	**AI agents** act on the same lane, with session, context, memory and replay from Laser SDK.
Underneath	**One durable event log.** LaserData, powered by Apache Iggy.

Try it in 15 minutes. Let the numbers decide.

A ready-made kit for Freshworks: **20,000 agents in 2,000 groups** taking tickets, chats and calls, routing nodes that assign like load-based Omniroute, a shift change with a ticket spike, a product-events neighbour and a shadow bridge. It prints your lane's p99 and work sent to an agent who is away, on a call or full, every second.

Open the Freshworks kit and write-up →

Then a 2–4 week evaluation on one mirrored agent state feed, beside Omniroute. **No advantage, no migration.**
