laserdata

Prepared for **Porter**

Real-time driver location for Porter's trip tracking, on LaserData.

Every driver-partner's location ping reaches **the live tracking link and the pickup and drop arrival checks in milliseconds**, for two-wheelers and trucks alike. It runs beside Cloud Pub/Sub, so nothing else has to move.

One mini-truck, one drop,
as the event log sees it.
Now multiply by every driver on the road.

14:38:05.118 ping #318
first ping inside 150 m

on the tracking link · +11 ms
sender and receiver see it

reached_drop · +15 ms
from ping #318, not one later

● ping every 5 s, mini-truck

14:21:30.212	trip.live	ORD004219876 · goods loaded at KR Market
14:38:05.118	driver.ping	DP0284731 · #318 · 12.9301, 77.5838 · 142 m
14:38:05.129	link.updated	+11 ms · tracking link, sender and receiver
14:38:05.133	reached_drop	ORD004219876 · from ping #318 · +15 ms

From the creators of APACHE IGGY

15×
faster P99 latency
than Apache Kafka

4×
higher throughput
than Apache Kafka

60–70%
lower infrastructure cost
compute, storage and network

Apache Iggy vs Apache Kafka, LaserData testing. Results vary by workload.

What you shared	**Pub/Sub and PostGIS** process live pings from active drivers; sender and receiver follow them on a tracking link. "We wanted to optimize our cloud costs." (Google Cloud; Porter)
Where it fits	**The driver ping lane:** location keyed by driver ID, read by the tracking link and the arrival checks. Pub/Sub and PostGIS keep the rest.
Next	**AI agents** act on the same lane, with session, context, memory and replay from Laser SDK.
Underneath	**One durable event log.** LaserData, powered by Apache Iggy.

Try it in 15 minutes. Let the numbers decide.

A ready-made kit for Porter: **20,000 drivers pinging every 5 s** in Bengaluru, arrival checks, a 3× booking surge, a 20× log burst next door and a Pub/Sub shadow bridge. It prints your lane's p99 every second.

Open the Porter kit and write-up →

Then a 2–4 week evaluation on one mirrored driver-ping topic, alongside Pub/Sub. **No advantage, no migration.**
