laserdata

Prepared for **CocoIndex**

Live PR-review context for CocoIndex agents, on LaserData.

Review-thread changes on Apache Iggy reach Postgres through **the Iggy connector CocoIndex already ships, in about 45 ms**, and a crashed indexer replays from Iggy without losing a change. Your Kafka path stays as it is, so nothing else has to move.

One review thread through a crash,
as an agent sees it.
Now multiply by every open PR.

14:02:10.000	comment	api-gateway#4182 retry.py:212, seq 7, into Iggy
14:02:10.043	row	seq 7 readable in Postgres; agents see it now
14:02:21.500	indexer	killed by SIGKILL; new changes wait in Iggy
14:02:26.500	restart	from the last offset stored after a write
14:02:31.120	resolve	{"_deleted": …}: the row is gone, no stale thread

From the creators of APACHE IGGY

15×
faster P99 latency
than Apache Kafka

4×
higher throughput
than Apache Kafka

60–70%
lower infrastructure cost
compute, storage and network

Apache Iggy vs Apache Kafka, LaserData testing. Results vary by workload.

What you shared	A snapshot taken at the start of an agent's run **"quickly drifts out of sync"**; production agents do better on change streams (George He, Apr 2026). CocoIndex ships an Apache Iggy source and target.
Where it fits	**PR review threads as live context for code-review agents:** an Iggy topic through topic_as_map into Postgres, offsets stored after each write.
Next	**Fixes found on a real broker,** offered upstream: the readiness sweep, a dropped read at catch-up, a stall at batch_length.
Underneath	**One durable event log.** LaserData, powered by Apache Iggy.

Try it in 15 minutes. Let the numbers decide.

A ready-made kit for CocoIndex: **20,000 open review threads, 300 changes/s**, resolved threads as deletes, a SIGKILLed indexer and a shadow of a Kafka topic you index today. It prints freshness and stale agent answers every second and checks every thread at the end.

Open the CocoIndex kit and write-up →

Then a 2–4 week joint evaluation on one mirrored topic, beside the Kafka source that reads it. **No advantage, no migration.**
