laserdata

Prepared for **Instacart**

Real-time session sequence for Instacart ads retrieval, on LaserData.

Every product view and cart add reaches the shopper's session sequence **in milliseconds, so the next ads carousel sees the cart they have now**. It runs beside Confluent and Flink, so nothing else has to move.

One shopper, one cart add, one carousel,
as the event log sees it.
Now multiply by the night before Thanksgiving.

18:42:07.310	cart.add	u0072214583 · ground beef · after milk, eggs, cereal
18:42:07.315	sequence.applied	seq 14 · cart: milk, eggs, cereal, ground beef · +5 ms
18:42:08.050	carousel.request	pre-checkout · needs seq 14
18:42:08.068	carousel.retrieved	1. hamburger buns · 2. mustard (sponsored)

From the creators of APACHE IGGY

15×
faster P99 latency
than Apache Kafka

4×
higher throughput
than Apache Kafka

60–70%
lower infrastructure cost
compute, storage and network

Apache Iggy vs Apache Kafka, LaserData testing. Results vary by workload.

What you shared	Ads retrieval reads the shopper's **"real-time session"** of product views, item page visits and cart adds; the rebuild lifted add-to-carts **34%** on home and pre-checkout (Instacart Tech, Jun 2026). Ads Quality wants fresh features "on the critical path of every ad request" (Oct 2026).
Where it fits	**The session sequence lane:** each action keyed by user, appended in order before the next carousel. Confluent, Flink and the feature store stay.
Next	**AI agents** act on the same lane, with session, context, memory and replay from Laser SDK.
Underneath	**One durable event log.** LaserData, powered by Apache Iggy.

Try it in 15 minutes. Let the numbers decide.

A ready-made kit for Instacart: **400,000 shoppers in session and 10,000 actions a second**, mid-cart aisle changes, a 2× busy-evening surge, an event firehose next door and a read-only Confluent bridge. It prints your lane's p99 and stale carousels every second.

Open the Instacart kit and write-up →

Then a 2–4 week evaluation on one mirrored session-events stream, beside Confluent Cloud. **No advantage, no migration.**
