laserdata

Prepared for **Jio Platforms**

Real-time 5G core probe records for Jio Platforms, on LaserData.

Every vProbe record reaches your anomaly check, and every network-function alert reaches the workflow engine, **in milliseconds, even in a signalling storm**. It runs beside ATOM, so nothing else has to move.

One AMF instance in one circle,
as the event log sees it.
Now watch every network function, every second.

14:22:07.200	sdr.registration	amf-mu-02 · fail · 5GMM #22 congestion
14:22:07.950	nf.degraded	amf-mu-02 · seq 412 · major · score 0.52
14:22:07.954	workflow.drain	+4 ms · new procedures to amf-mu-01, -03
14:22:07.955	noc.alert	amf-mu-02 · to network operations

From the creators of APACHE IGGY

15×
faster P99 latency
than Apache Kafka

4×
higher throughput
than Apache Kafka

60–70%
lower infrastructure cost
compute, storage and network

Apache Iggy vs Apache Kafka, LaserData testing. Results vary by workload.

What you shared	vProbes in every CNF feed ATOM, which processes **50 million records a second** and finds anomalies down to each end node (2021). **285 million 5G users** and 10 live slices sold on SLAs (2025–26).
Where it fits	**The probe record lane:** SDRs in, keyed by NF instance; health alerts out to the workflow engine. ATOM, the probes and the data lake stay.
Next	**AI agents** act on the same lane, with session, context, memory and replay from Laser SDK.
Underneath	**One durable event log.** LaserData, powered by Apache Iggy: open source, one binary, on your own servers.

Try it in 15 minutes. Let the numbers decide.

A ready-made kit for Jio Platforms: **20,000 SDRs a second with a 3× signalling storm**, 90 AMF, SMF and UPF instances in 10 circles, injected NF incidents, a workflow engine that counts late alerts, RAN counters next door and a Kafka shadow bridge. It prints both hops' p99 every second.

Open the Jio Platforms kit and write-up →

Then a 2–4 week evaluation on one mirrored probe-record slice and its alerts, on your own servers, beside ATOM. **No advantage, no migration.**
