laserdata

Prepared for **Flipkart**

Real-time ad spend and budget stops for Flipkart Ads, on LaserData.

Every billable view and click reaches **BCAP, charged once, and every budget stop reaches every ad server, in milliseconds**. It runs beside Flink and Pub/Sub, so nothing else has to move.

One campaign at Big Billion Days,
as the event log sees it.
Now multiply by every campaign.

```
20:00:07.398   billable.click   cmp-04127   ads-03   ₹49,991.40
20:00:07.405   billable.click   same click resent as IMP_…   dropped, charged once
20:00:07.412   billable.click   cmp-04127   ads-06   ₹50,003.10
20:00:07.416   bcap.stop        cmp-04127   budget   +4 ms
20:00:07.419   stop applied     8/8 ad servers, before their next ad   +3 ms
```

From the creators of APACHE IGGY

15×
faster P99 latency
than Apache Kafka

4×
higher throughput
than Apache Kafka

60–70%
lower infrastructure cost
compute, storage and network

Apache Iggy vs Apache Kafka, LaserData testing. Results vary by workload.

What you shared	Flipkart Ads handles **~1M events a second**. If spend lags even minutes, ads serve **after the budget is exhausted**; BCAP uses watermark progress to bound that lag. (Flipkart Tech Blog, Jan 2026)
Where it fits	**The billable lane:** views and clicks keyed by campaign into BCAP, charged once, stops back to every ad server. Flink, batch settlement and Pub/Sub stay.
Next	**AI agents** act on the same lane, with session, context, memory and replay from Laser SDK.
Underneath	**One durable event log.** LaserData, powered by Apache Iggy.

Try it in 15 minutes. Let the numbers decide.

A ready-made kit for Flipkart Ads: **8 ad servers, 10,000 campaigns, 10,000 billable events/s** with repeats and late events, BCAP with your dedupe and one-hour rules, a telemetry flood next door and a Pub/Sub or Kafka shadow bridge. It prints your lane's p99 and over-burn in ₹ every second.

Open the Flipkart kit and write-up →

Then a 2–4 week evaluation on one mirrored billable-events stream, alongside Pub/Sub. **No advantage, no migration.**
