laserdata

Prepared for **redBus**

Real-time boarding-point alerts for redBus, on LaserData.

Every bus GPS packet becomes **ENTRY, HALT or EXIT at the boarding point and an alert to each waiting passenger, in milliseconds**. It runs beside YourBus's Kafka, so nothing else has to move.

One bus, one boarding point,
as the event log sees it.
Now multiply by every journey tonight.

22:31:40.118 packet #212
first inside 200 m of Hebbal

ENTRY · +11 ms
from packet #212, not one later

6 passengers alerted · +17 ms
while the bus is still there

● GPS packet every 45 s

21:30:02.415	assigned	OP01487-BLR-HYD-2130_20261022 · 6 boarding at Hebbal
22:31:40.118	gps.packet	#212 · 13.0344, 77.5964 · 168 m from Hebbal
22:31:40.129	bp.ENTRY	Hebbal · from packet #212 · +11 ms
22:31:40.135	alert.arriving	6 passengers · "your bus is at Hebbal" · +17 ms

From the creators of APACHE IGGY

15×
faster P99 latency
than Apache Kafka

4×
higher throughput
than Apache Kafka

60–70%
lower infrastructure cost
compute, storage and network

Apache Iggy vs Apache Kafka, LaserData testing. Results vary by workload.

What you shared	**YourBus moved to Kafka,** keyed by SVC_DOJ: GPS from 15K services into ENTRY/HALT/EXIT at each boarding point and passenger alerts. "We replay the messages for simulation and debugging purposes." (redBus engineering blog)
Where it fits	**The boarding-point lane:** GPS packets keyed by SVC_DOJ, read by boarding-point detection and the passenger alerts. Kafka keeps the rest.
Next	**AI agents** act on the same lane, with session, context, memory and replay from Laser SDK.
Underneath	**One durable event log.** LaserData, powered by Apache Iggy.

Try it in 15 minutes. Let the numbers decide.

A ready-made kit for redBus: **15,000 journeys sending GPS every 45 s** out of Bengaluru, Hyderabad and Chennai, boarding-point and alert checks, a 3× festival night, a 10× log burst next door and a Kafka shadow bridge. It prints your lane's p99 every second.

Open the redBus kit and write-up →

Then a 2–4 week evaluation on one mirrored GPS topic, alongside Kafka. **No advantage, no migration.**
