laserdata

Prepared for **PostHog**

Real-time event streams for PostHog's Live tab, on LaserData.

Each project's events reach the pod serving its Live view **in milliseconds, straight from the log, without reading the whole firehose or dropping an event**. It runs beside MSK and WarpStream, so nothing else has to move.

One project, one launch,
as the event log sees it.
Multiply by every open Live view.

14:00:12.400	capture	$pageview · /launch · project 21907 · person v-48213
14:00:12.401	lane	+1 ms · partition 37 · seq 120,334
14:00:12.403	live	+3 ms · shown on Live · no other node, no pub/sub hop
14:00:30.000	open	a teammate opens Live · filled from the lane: 6,412 events

From the creators of APACHE IGGY

15×
faster P99 latency
than Apache Kafka

4×
higher throughput
than Apache Kafka

60–70%
lower infrastructure cost
compute, storage and network

Apache Iggy vs Apache Kafka, LaserData testing. Results vary by workload.

What you shared	Livestream reads the **whole MSK firehose and spends most of its CPU on events nobody watches**; per-project Redis publishes mostly reach no one, cross AZs, and fill the buffer so watched events drop. (PostHog PRs #111908, #109338, #111332, Oct 2026)
Where it fits	**The live events lane:** one compact record per event, keyed by project; each pod reads only its viewers' partitions. Capture, ingestion, ClickHouse and MSK stay as they are.
Next	**AI agents** watch the same lane as it happens, with session, context, memory and replay from Laser SDK.
Underneath	**One durable event log.** LaserData, powered by Apache Iggy.

Try it in 15 minutes. Let the numbers decide.

A ready-made kit for PostHog: **100,000 projects sending 50,000 events a second**, Live views opening and closing, a launch at 10,000 events a second, every watched event checked by sequence, new views filled from the log, and an MSK shadow bridge. It prints your lane's p99 every second.

Open the PostHog kit and write-up →

Then a 2–4 week evaluation on one region's Live traffic, alongside MSK. **No advantage, no migration.**
