laserdata

Prepared for **Rapido**

Real-time captain location for matching at Rapido, on LaserData.

Every on-duty captain's location ping reaches **the matching engine and the customer's pickup tracker in milliseconds**, even at the office-hour peak. It runs beside Kafka, so nothing else has to move.

One captain, one ride request,
as the event log sees it.
Now multiply by every captain on duty.

```
09:12:05.104 ping #212
in the matching index · +9 ms

09:12:06.380 ride requested
offered to CAP0417263 · +6 ms
from ping #212, its latest

● free captain, pinging every 5 s
○ on a ride, skipped
```

```
09:12:05.104   captain.ping     CAP0417263 · #212 · 17.4360, 78.3664 · free
09:12:05.113   index.applied     +9 ms · cell 1743:7836
09:12:06.380   ride.requested   R3104582217 · pickup HITEC City
09:12:06.386   ride.offered     CAP0417263 · 1.4 km · from ping #212 · +6 ms
```

From the creators of APACHE IGGY

15×
faster P99 latency
than Apache Kafka

4×
higher throughput
than Apache Kafka

60–70%
lower infrastructure cost
compute, storage and network

Apache Iggy vs Apache Kafka, LaserData testing. Results vary by workload.

What you shared	Matching finds **the nearest available captain** from real-time location, for 15,000+ ride requests a minute. "Being a real-time service, we needed … low latency." (Google Cloud; Rapido, 2026)
Where it fits	**The captain lane:** on-duty pings keyed by captain ID, read by the matching index and the customer's pickup tracking. Kafka keeps the event bus and analytics.
Next	**AI agents** act on the same lane, with session, context, memory and replay from Laser SDK.
Underneath	**One durable event log.** LaserData, powered by Apache Iggy.

Try it in 15 minutes. Let the numbers decide.

A ready-made kit for Rapido: **50,000 captains pinging every 5 s** in Hyderabad, a nearest-captain matcher, a 3× office-hour peak, a 20× campaign burst next door and a Kafka shadow bridge. It prints your lane's p99 every second.

Open the Rapido kit and write-up →

Then a 2–4 week evaluation on one mirrored captain-ping topic, alongside Kafka. **No advantage, no migration.**
