laserdata

Prepared for **Dream11**

Live fantasy points on every ball for Dream11, on LaserData.

Every ball's points reach **every points node in milliseconds**, and a node added mid-match rebuilds every live match from the log. It runs beside Kafka, so nothing else has to move.

One ball, one node added mid-match,
as the event log sees it.
Now multiply by every live match.

20:41:07.300	ball	MI v CSK · 17.3 · SIX · batter now 62 pts · #214
20:41:07.303	points.applied	node-1 … node-40 · +3 ms · every team holding him
20:41:08.000	node.added	node-41 · replays today's log from the line-ups
20:41:08.080	points.rebuilt	40 of 40 live matches · team view and leaderboard on one ball

From the creators of APACHE IGGY

15×
faster P99 latency
than Apache Kafka

4×
higher throughput
than Apache Kafka

60–70%
lower infrastructure cost
compute, storage and network

Apache Iggy vs Apache Kafka, LaserData testing. Results vary by workload.

What you shared	Kafka runs **"in the critical pipelines of end user services"** at 15M+ peak concurrency, with surges just before match start; a custom consumer fixed delays, data loss and "frequent rebalancing". Points were once updated every minute, by polling. (Dream11, 2017–2025)
Where it fits	**The live points lane:** every ball keyed by match, read by every points node with its own offsets, kept for the match day for rebuilds. Kafka, Flink, Aerospike and the leaderboard stay.
Next	**AI agents** act on the same lane, with session, context, memory and replay from Laser SDK.
Underneath	**One durable event log.** LaserData, powered by Apache Iggy.

Try it in 15 minutes. Let the numbers decide.

A ready-made kit for Dream11: **40 live matches, ball by ball**, points nodes holding 200,000 teams each, a toss surge of 28,000 team saves and contest joins a second next door, a node added mid-match and a Kafka shadow bridge. It prints your lane's p99 every second.

Open the Dream11 kit and write-up →

Then a 2–4 week evaluation on one mirrored score topic, alongside Kafka. **No advantage, no migration.**
